Evimetal Design Center

2023-2024
Product Catalogue

Ismail Altunç : Founder 1967

- Evimetal, Turkey's first manufacturer of Inox bathroom products and also the sector leader for many years, has a design center accredited by the Ministry of Industry and Technology.
- This long journey, which started in Istanbul in 1967, has turned into a deep-rooted, strong and constantly developing culture in product design, mold making and manufacturing.
- Evimetal comes up with the solutions to the most complex and special needs of all users by offering more than 3000 alternative products with more than 100 models, 9 different colors and surface options in shower channels, drains, corner-finish profiles and towel radiators.
- Evimetal also offers individual solutions to the consumers, as it has of a fully integrated factory that is constantly developing.
- The company has many advantages provided by its 56 years of experience and well-organized, qualified production force.
- Its R&D team of 12 designers and engineers who won prizes at national and international competitions, its specialized sales team, and references are the driving force behind Evimetal's success.
- As it has its own designers, Evimetal is able to solve any kind of problems beforehand and also manufactures products that are high-quality and cost-effective.
- Quality of the products are guaranteed by its qualified production force, its state-of-the-art machinery, and 1st class stainless-steel having the V2A quality certificate.
- Products approved by TÜV-Germany that conform with the EN-1253 and CE standards represent the quality mentality of Evimetal.
- As a precaution to the global logistics problems, Evimetal has created production centers in Turkey and Europe. It aims to meet the demands of different markets of the world by offering them a wide product range at different production locations.
- Its market share and reputation has encouraged and motivated Evimetal to expand into the global market. Evimetal and its group companies export to all European countries, North America, MENA region, Caucasus and Central Asian countries.
- By this strategic decision, Evimetal has unconditionally assumed the responsibility of offering and timely delivering its qualified products meeting the international standards at the best rates and in the best conditions to the construction sector, its network of global dealers and distributors.
- Evimetal offers unconditional customer satisfaction to all its customers with its modern solutions.
- Evimetal has taken an important step towards becoming a global actor in the bathroom products sector by combining its deep-rooted experience and its strength as a sector leader with Gruen who is an innovative brand of Germany in the shower drain systems and profiles sector, in 2021.

Linear Shower Drains

WallLine

Easy Levelling

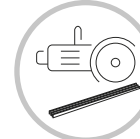

Stainless Steel

High Drain Capacity

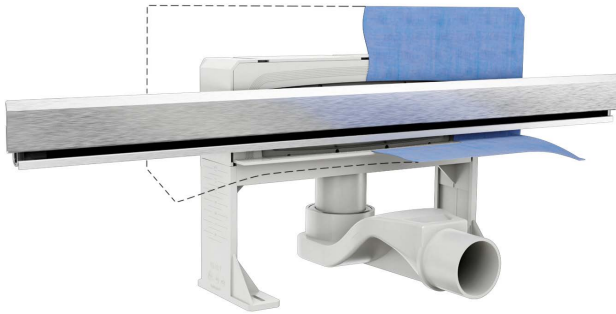

Easy Cleaning

Cuttable

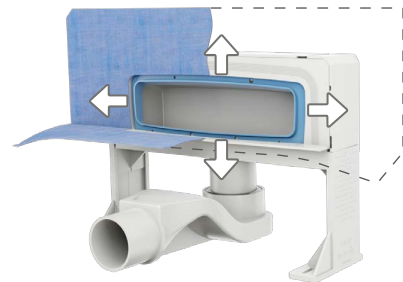

WallLine, the first patented wall drain cut to suit the projects' needs, has crowned its success with design awards. Having won the 2017 Design Turkey Best Design Award, WallLine also received the IF Design Award, one of the most prestigious design awards in Germany and The World. WallLine wall drains offer a neat appearance, an uninterrupted view from wall to wall, and functionality.

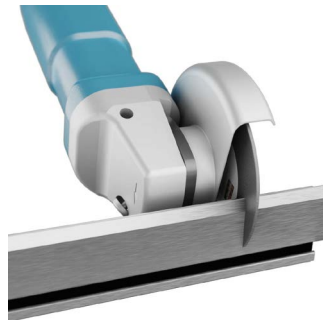

Eccentric flange with integrated membrane and height-adjustable fixing parts, compatible with your floor and wall insulation.

In-Wall Built-in Tank

In-wall built-in tank offers you more durable and easier mounting thanks to its patented eccentric adjusting flange. It can be used with different covering materials up to 30 mm thickness.

Hair trap in the inner tank can be cleaned easily.

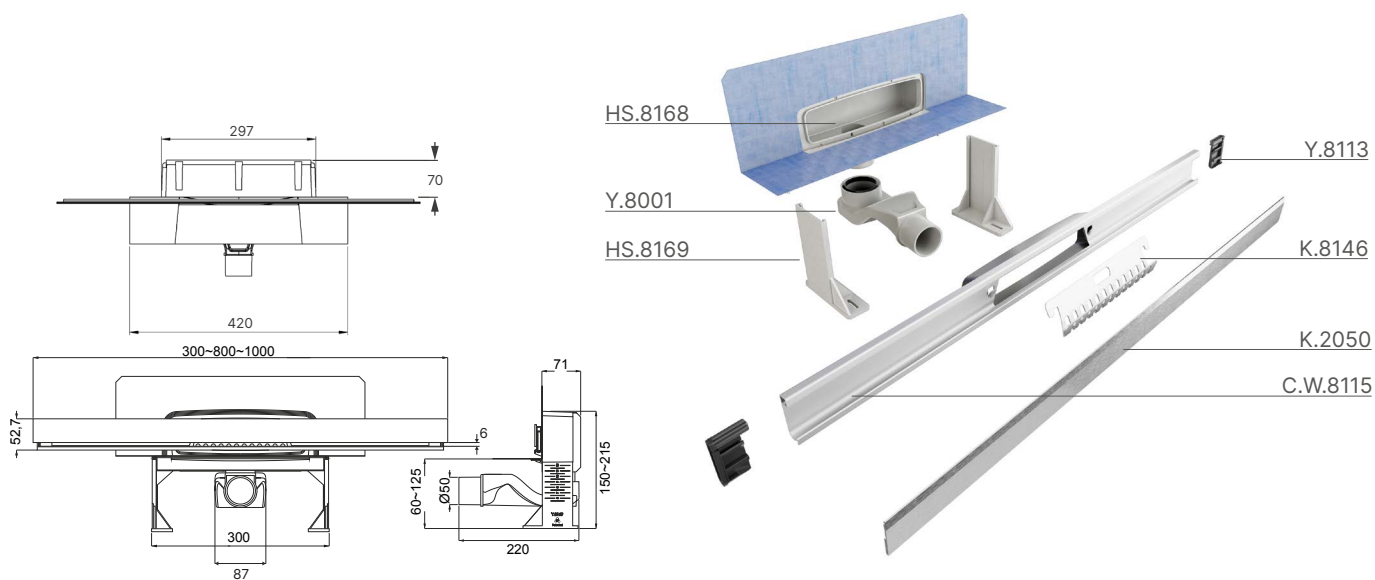

It can be cut and adapts to any desired size between 30-100 cm.

It is safe to use thanks to water sealing closure piece.

HighLine

Stainless Steel

Sloped & Weldless Body

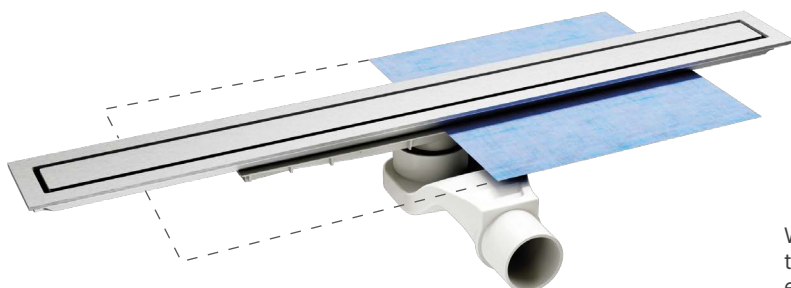

High Drain Capacity

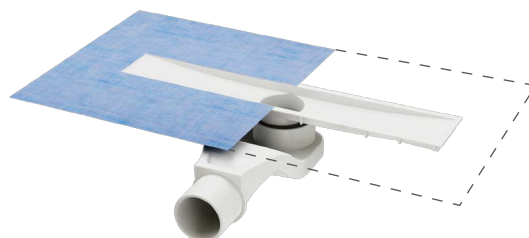

Easy Cleaning

Well-Thought-Out Details, High Standards

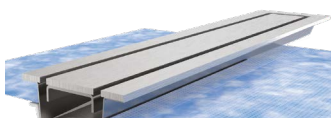

HighLine easily meets the expectations of high standards and hygiene enthusiasts. Impressive with its cover and frame having sharp edges with a 3 mm solid body, HighLine has a flawless appearance, quality craftsmanship and original design. Its high strength and morphed internal structure prevent accumulation of dirt, while its high capacity flow rate meets all of your discharge expectations.

While its morphed internal structure makes it easier to discharge under-tile water leakage, it also ensures safety against under-tile water leakage thanks to its flange with textile laminated on the tank. It is also compatible with all your insulation materials.

Hair Trap

Gradual Height Adjustment Set

Professional Solution

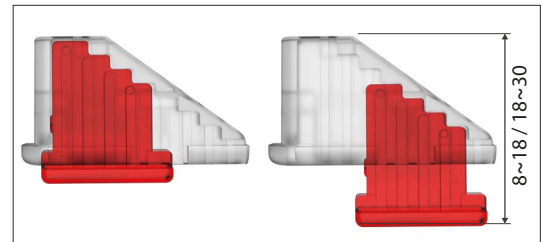

Proline is professional solution for your projects, the metal tank structure of different lengths up to 120 cm ensures that it is firmly locked into the concrete and serves for a long lasting usage. With its gradual height adjustment piece, it allows you to make the desired height adjustment on the leveling concrete according to your project. While its insulation membrane laminated into the steel tank guarantees impermeability, it also conforms with all of your insulation materials. With its ceramic and marble cover options, you achieve the sense of wholeness in your bathroom and shower area.

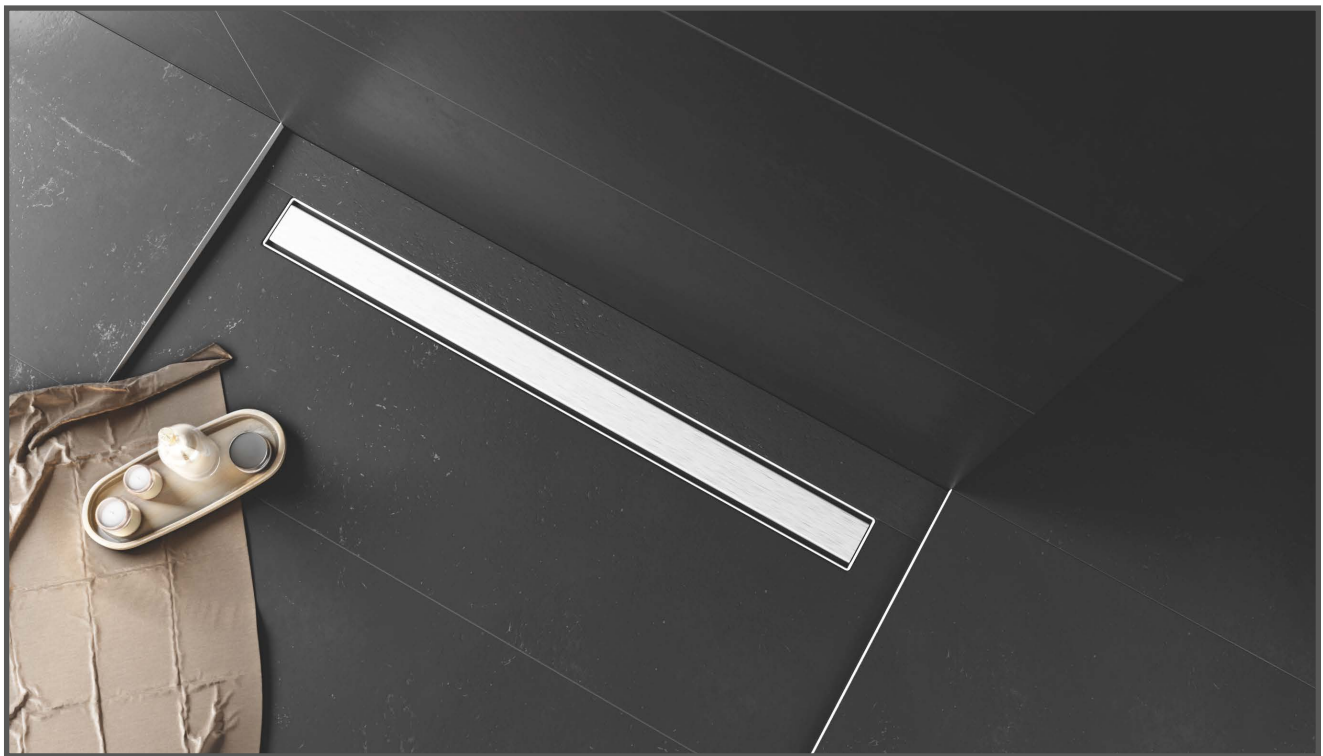

While the steel tank that has equal length with the cover, and its morphed internal structure make it easier to discharge under-tile water leakage, it also ensures safety against under-tile water leakage thanks to its flange with textile laminated on the tank. It is also compatible with all your insulation materials.

* Lower EPS parts ensure convenience in leveling the ground at different heights (65~95 mm).

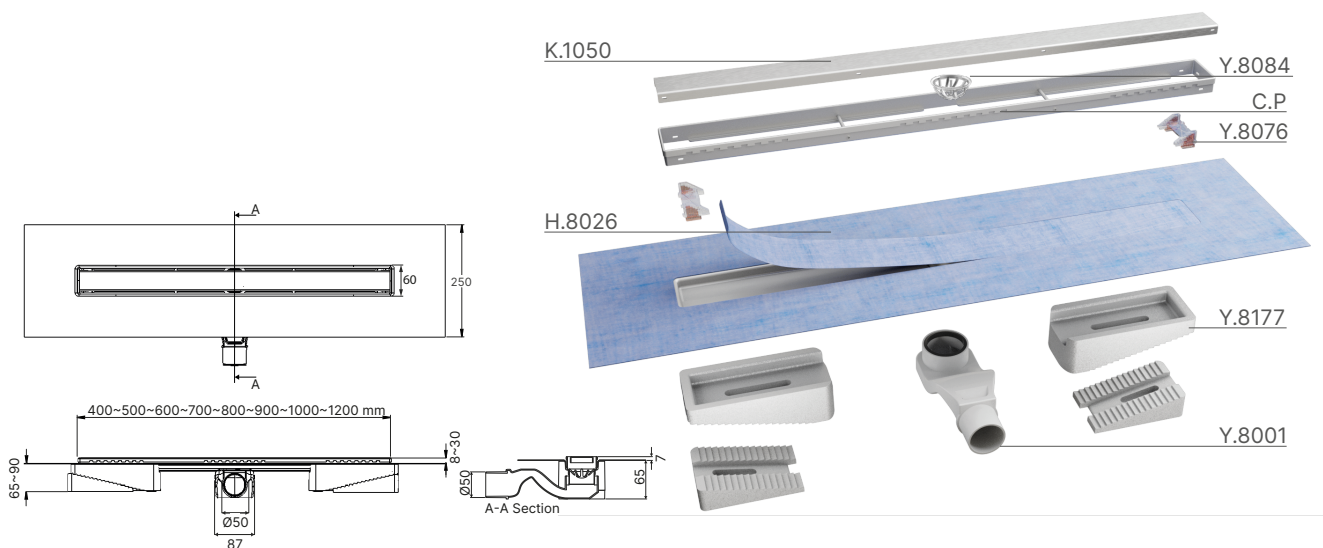

* Allows surface alignment with thin ceramic-marble by reducing the height of the internal part (8~18 / 18~30 mm).

ZetLine

Easy Levelling

Stainless Steel

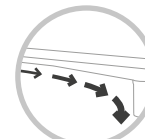

Reversible Cover

High Drain Capacity

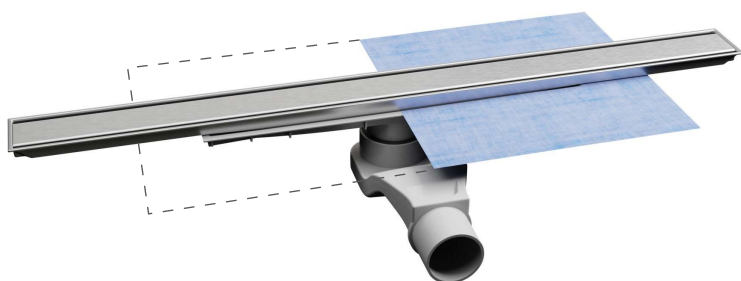

Easy Cleaning

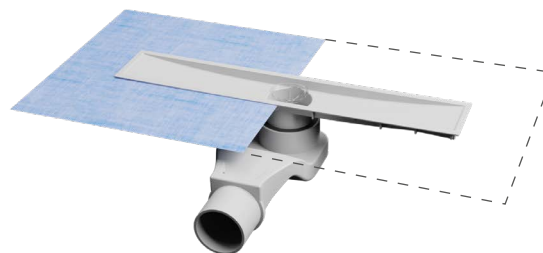

Sloped & Weldless Body

Designed for maximum hygiene

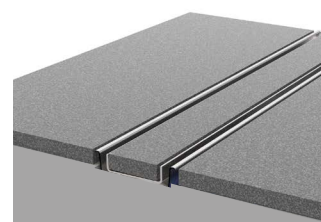

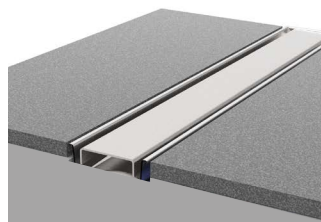

ZetLine draws attention with its framed and morphed steel tank. While the morphed internal structure increases the discharge capacity, it also allows dirt accumulated in the tank to flow into the plumbing. Also, its simple internal structure makes it easy to clean. As a levelled shower channel, it is suitable for ceramic-marble coating inside the cover. The hair & dirt trap inside the tank allows fast and practical cleaning to ensure a continuous usage.

While its morphed internal structure makes it easier to discharge under-tile water leakage, it also ensures safety against under-tile water leakage thanks to its flange with textile laminated on the tank. It is also compatible with all your insulation materials.

Hair Trap
Please refer to the accessories page 28 for details.

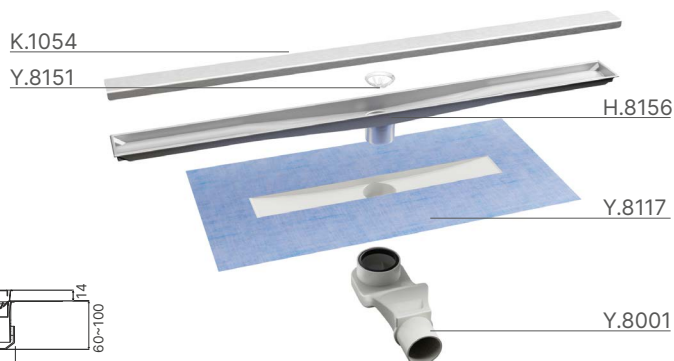

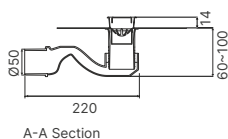

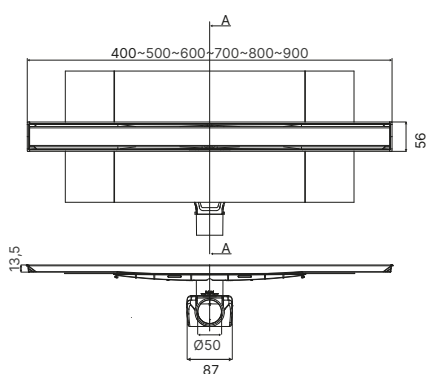

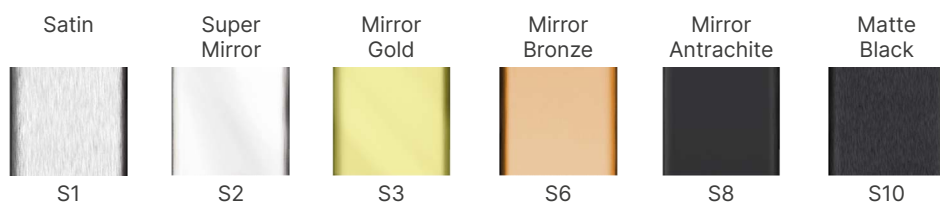

For double-sided use, ceramic-marble cut to size is placed inside the top cover. With this double function, surface and drain are levelled.

TrendLine

Easy Levelling

Stainless Steel

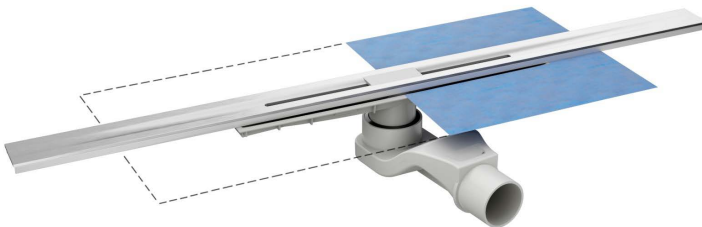

High Drain Capacity

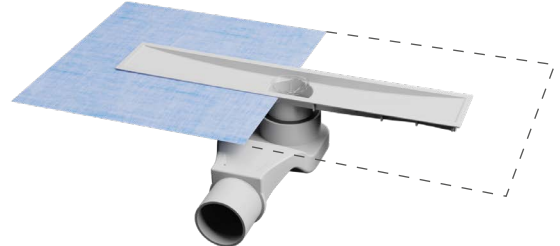

Easy Cleaning

Self Tilting Cover

TrendLine shower channel, which is an extremely hygienic and patented product that can be easily used for bathing areas, is designed for those who want easy application and healthy solutions in modern bathing areas. Like any other shower channels of Evimetal that can be conveniently used in front of a wall or in the center of a shower area, TrendLine shower channel can be cut in desired size and used wall-to-wall. With the TrendLine self-tilting cover, the water flows easily into the drain system. You only need to wipe the cover surface with a damp cloth.

While its morphed internal structure makes it easier to discharge under-tile water leakage, it also ensures safety against under-tile water leakage thanks to its flange with textile laminated on the tank. It is also compatible with all your insulation materials.

Hair Trap

Hair and undesired pieces are trapped thanks to the hair trap. It is extremely easy to remove and clean.

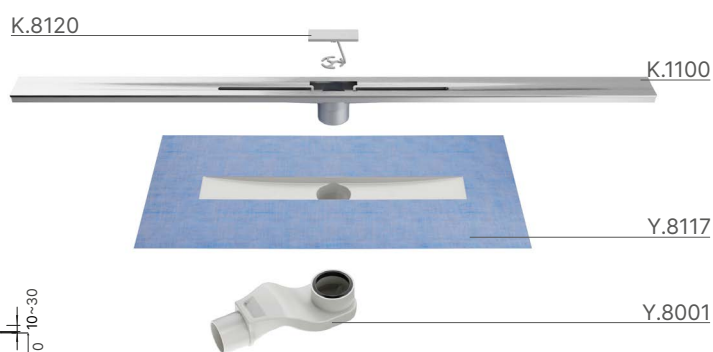

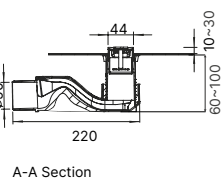

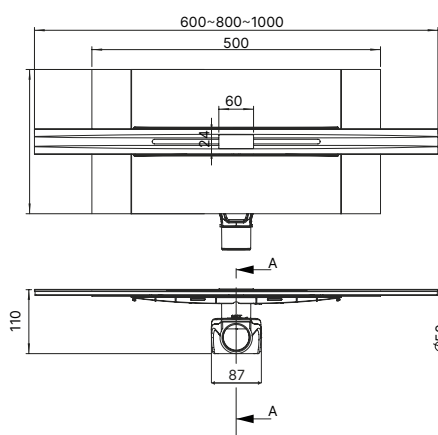

It can be cut and adapted to any desired size between 60-100 cm.

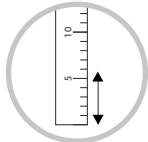

Thanks to its self-inclined cover design, water can easily fall into the drain and be discharged.

High Discharge Capacity

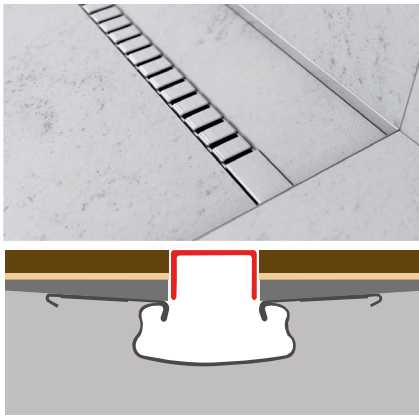

SlimLine slot shower channels, despite their slim bodies, handle with large amount of water due to large shower heads and rainfall type shower systems. Water flows easily under your feet. Cover and body structure in different sizes, compatible with siphons with high discharge capacity, are produced to provide the most suitable solution for your projects. It provides easy assembly with its central outlet body and 360 degree rotating siphon structure.

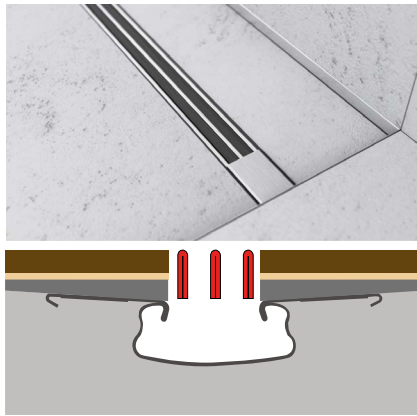

SlimLine product line has 100-200 and 300 cm options, can be cut according to desired size, and offers tailor-made usage in your projects thanks to its application diversity. The insulating finished body and the solid metal body with an integrated insulation band are designed to withstand heavy conditions and meet high flow rates.

It offers precise working according to different height settings with its apparatus compatible with the leveling heights (h: 60~100 mm).

Point Drains with Insulation Flange

It is designed for general usage areas that are compatible with different application heights and require low application height with its compact body structure. Anti-odor trap with integrated sealing gasket prevents odor leaks. Its bucket offers easy cleaning and practical use by preventing the wastes such as hair, dirt, soap that may occur during cleaning from clogging the drain. Our product is offered as plastic frame and metal frame.

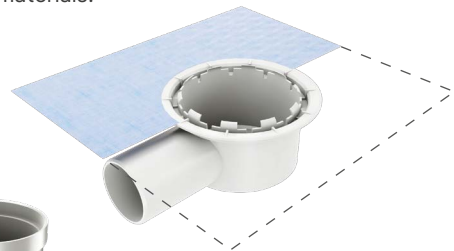

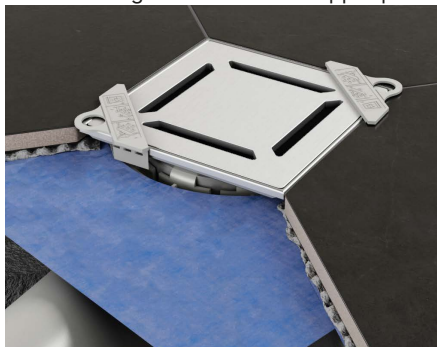

Anti-odor trap and cleaning bucket
with integrated sealing gasket

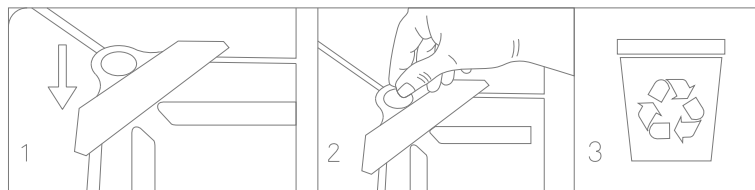

While its morphed internal structure makes it easier to discharge under-tile water leakage, it also ensures safety against under-tile water leakage thanks to its flange with textile laminated on the tank. It is also compatible with all your insulation materials.

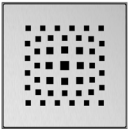

The tank connected to the plumbing may not always be connected in parallel to the discharge concrete. Since the frame is placed on this structure, all the problems on the ground are reflected on the cover. Custom-made patented articulated system ensures that regardless the number of defects in the lower part, it is corrected without being reflected on the upper part.

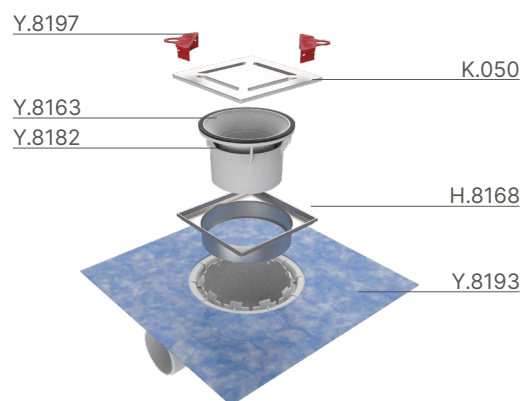

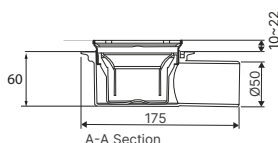

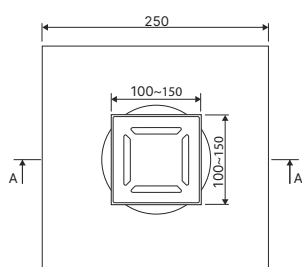

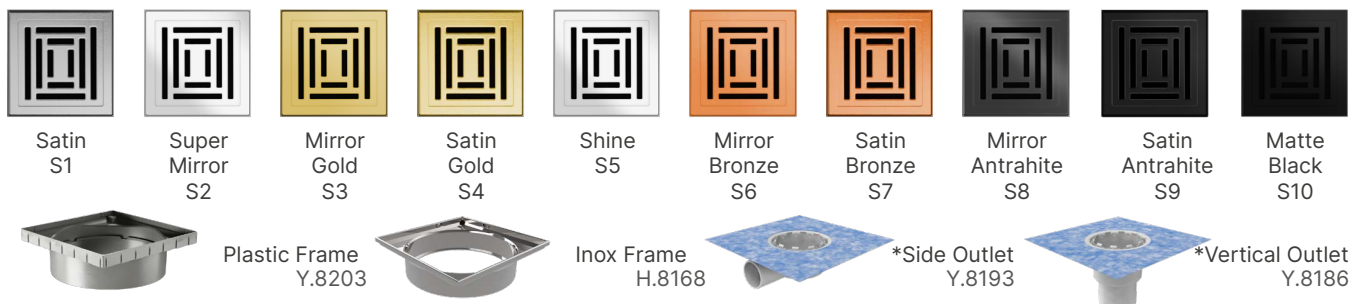

Extension Part
Y.8099

Convenient surface alignment tool, frame, and articulated tank, the tile height is easily and quickly aligned. After completing the adhesion, hold the round ring and tear it off. Torn pieces can be recycled.

Point Drain with S Siphon

Floor drains attract attention with their ultra thin frames, aesthetical appearance, easy application, and safe body. It guarantees impermeability thanks to the minimal side outlet siphon with an insulating membrane. It prevents odors with its S structure forming a water curtain. With its spiral-shaped hair trap, it offers you great comfort while minimizing maintenance and cleaning times. In addition to different inox cover options to be positioned in thin frames suitable for different heights and surfaces, it enables excellent solutions to be produced with the option that allows the tile piece to be placed in the frame. Our product is offered as metal frame.

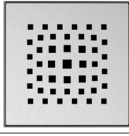

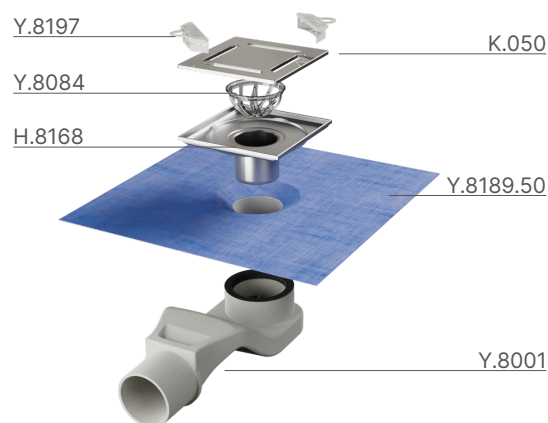

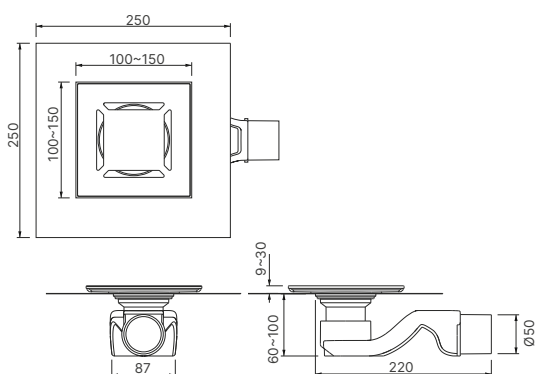

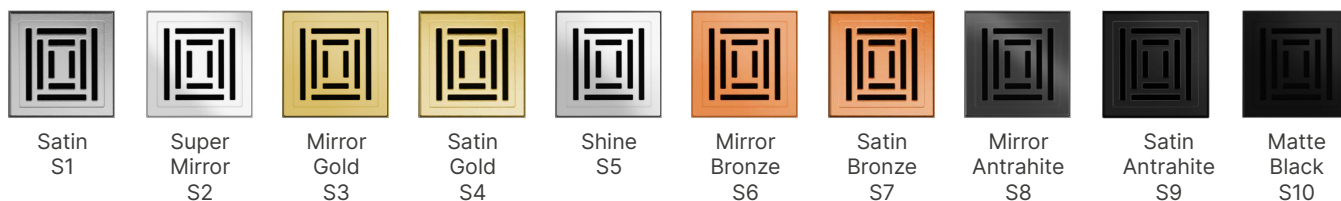

Articulated Tank; it eliminates the errors that occur during the coating between the tank and the surface.

While its morphed internal structure makes it easier to discharge under-tile water leakage, it also ensures safety against under-tile water leakage thanks to its flange with textile laminated on the tank. It is also compatible with all your insulation materials.

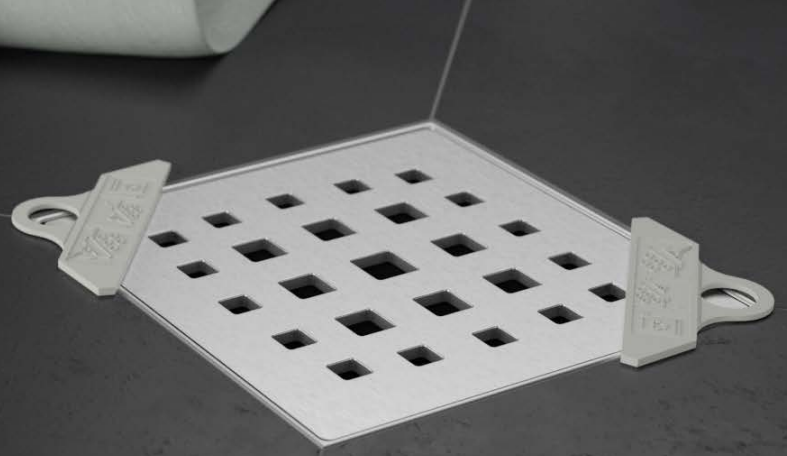

With the surface alignment apparatus, the height of the tile and the height of the point floor drain are easily and quickly aligned. After fixing the tile and the floor drain using an adhesive, pluck off the round ring. You can dispose of the plucked piece.

Classic Point Drain

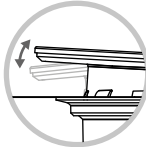

High Drain Capacity

Easy Levelling

Stainless Steel

Articulated Head Alignment Adjustment

Reversible Cover

Easy Cleaning

Easy Levelling Part

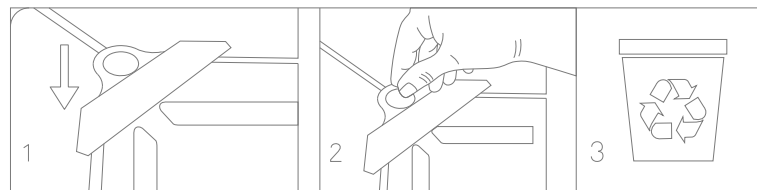

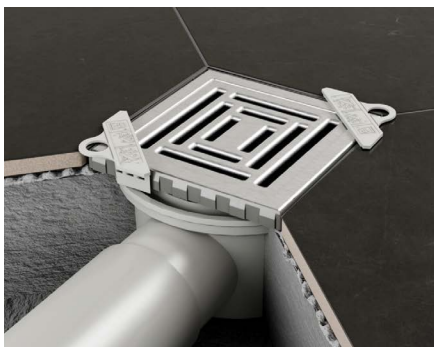

Patented Easy Levelling Apparatus

Classic Type Point Drain

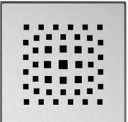

It is designed for general usage areas that are compatible with different application heights and require low application height with its compact body structure. Anti-odor trap with integrated sealing gasket prevents odor leaks. Its bucket offers easy cleaning and practical use by preventing the wastes such as hair, dirt, soap that may occur during cleaning from clogging the drain. Our product is offered as plastic frame and metal frame.

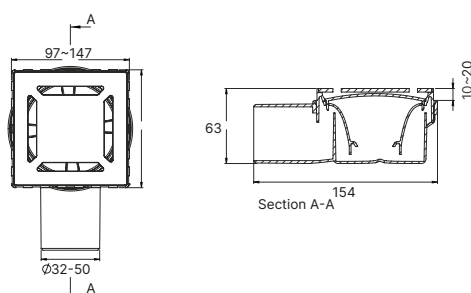

Anti-odor trap and cleaning bucket with integrated sealing gasket

Convenient surface alignment tool, frame, and articulated tank, the tile height is easily and quickly aligned. After completing the adhesion, hold the round ring and tear it off. Torn pieces can be recycled.

New Side Outlet Minimal Siphon that is Compatible With All of Our Products

High Flow Input and Output

The Minimal Siphon, which provides high capacity discharge with minimal dimensions, used with all our shower channels, enables high flow. Although minimal in size, it has an high capacity performance. This makes it ideal for narrow and small spaces. Thanks to its custom-designed patented form, it self-cleans dirt and debris using the flow rate of the water. Unlike classical siphons, it prevents the formation of odor originating from the drain with its special water curtain. The integral gasket in the body prevents liquid leakage.

No Odor

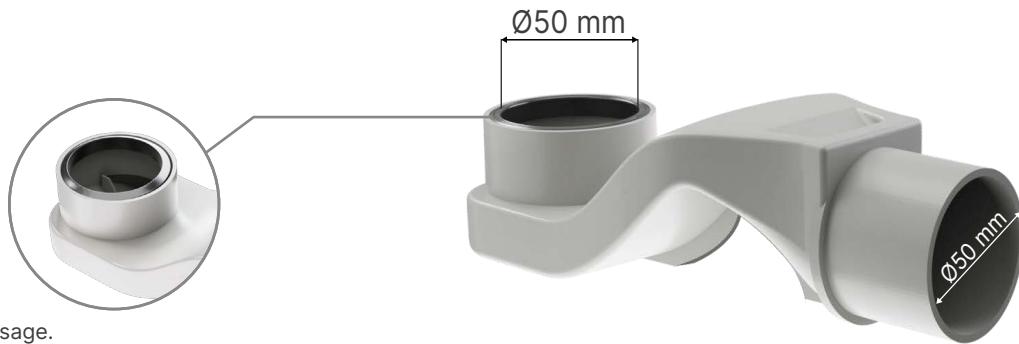

High Drain Capacity

Easy Cleaning

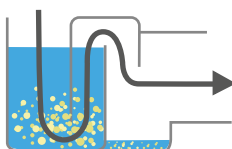

Patented Body

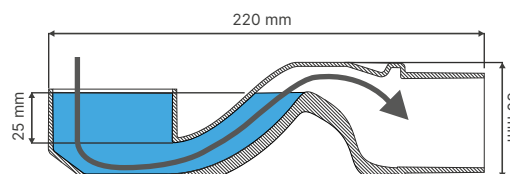

This gasket also enables a safe usage.

This siphon, according to the TÜV EN-1253 standards, offers high discharge rates with 48 Lt per minute. Its special minimal size makes it is practical for small spaces.

Siphons with Classic Traps (Hair and dirt may pile up)

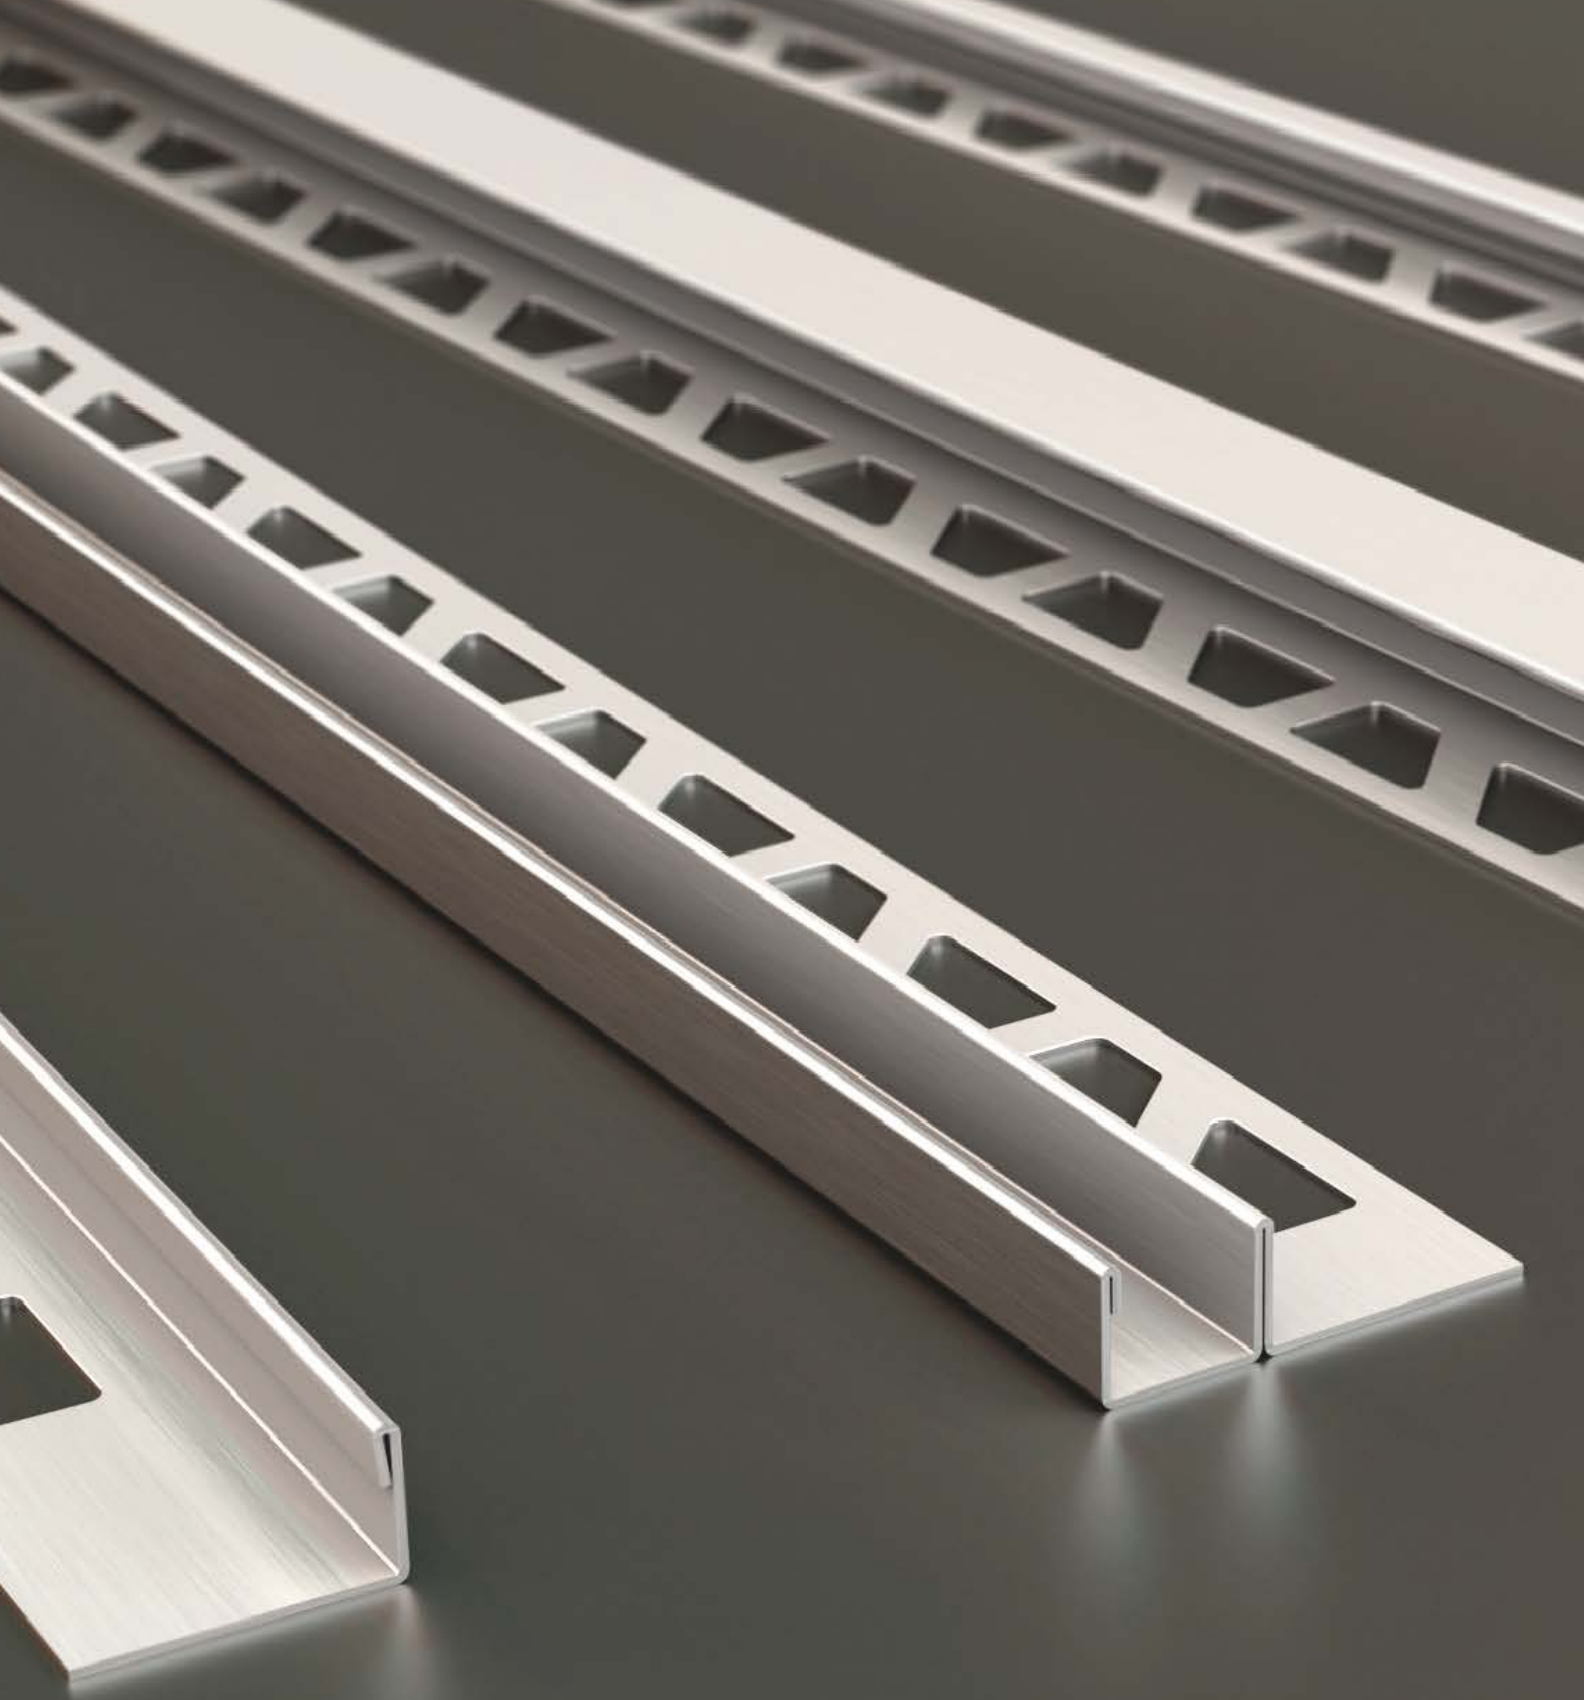

Vertical Siphon with its Patented Special Design Form (Hair and dirt will not pile up)
It specially designed form and high flow rate, it prevents hair and dirt from piling up. S type siphon prevents odor. (Thanks to a water barrier of 25 mm)

Optional Parts That Can Be Used With Our Products

Accessories

<div><div></div><div><p>Anti-Odor Membran Waterless Trap</p><p>After siphon and non-siphon usage, it prevents undesirable odor formation that may occur due to the fact that water has remained in the tank for a long time or dried over time. It also averts insects and bugs that may crawl back from the drains.</p><p>Features</p><p>Performs high-capacity water discharge. Equipped with an hair & dirt trap which does not hinder the siphon's capacity. It has 40 mm and 50 mm diameter outlet sizes.</p><table><tr><td>Y.8181</td><td>40 mm</td></tr><tr><td>Y.8155</td><td>50 mm</td></tr></table></div></div>	Y.8181	40 mm	Y.8155	50 mm	<div><div></div><div><p>Y.8002 Bottom Outlet Siphon</p><p>High capacity bottom outlet siphon that complies with the 100 mm core diameter, thanks to its S structure, offers an absolute solution to the undesired odor leakage problems that may occur with the products equipped with traps.</p><p>Features</p><p>It prevents odors with its high water discharge capacity of 66 Lt and S structure. No integral seal fluid leaks. Profiles

Stainless Steel

Profile Options

Evimetal Technique Profiles

Evimetal offers solutions for the use of stainless steel technical profiles, ceramics and different coating materials. It also offers ideal combinations with the functionalities and designs of technical profiles. Offering a wide product range, different options, and dimensions compatible with different thicknesses, Evimetal technical profiles are the ideal choice for your new construction and renovation projects.

Evimetal profiles offer many combinations thanks to their functionality and designs. It answers many needs including transition from one material to another, corner finishes, wall, floor, stair finishes, floor to glass profiles. The protective film on the products protects your profile until the application is completed. It is up to you to shape your living space with angled cut ceramics, dual multi-use interior and exterior corner transitions, and different height transitions. It ensures perfect finishes where used. As you increase the durability of your flooring, you can easily use Evimetal profiles to obtain a more attractive appearance.

Wide Range of Colors

-Evimetal products are available in 9 surface alternatives. You can also have your needs tailor-made.
-Titanium PVD is used on gold, bronze and antracite surfaces.

-The protective film on them should not be removed until the application is completed.
Chemicals should not be used during cleaning and use.

-Surface alternatives in 244 cm profile options are;
Super Mirror, Mirror Gold, Mirror Bronze, Mirror Antracite and color matte.

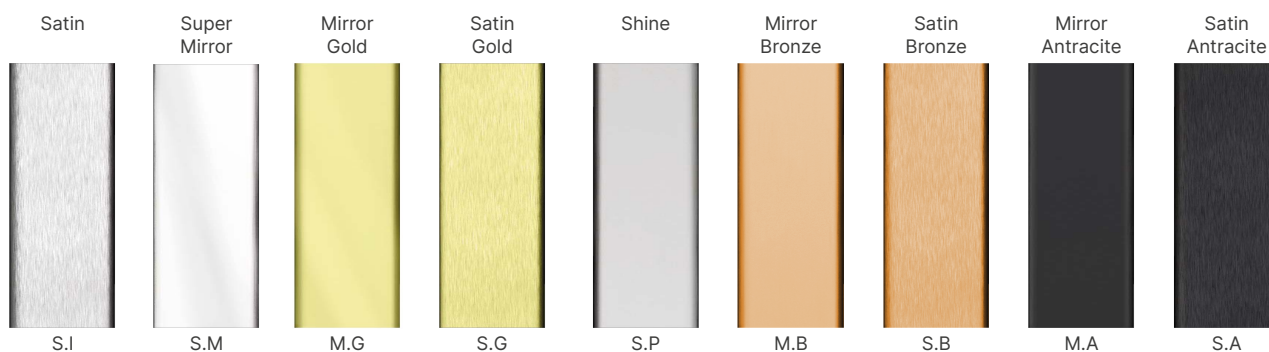

-Surface alternatives in 250 cm profile options are Satin and Shine. Profile production up to 300 cm is available.

Please refer to your sales consultant for any technical questions about the solutions specially designed for your project, as well as the areas of use.

*Minimal changes may occur in color shades depending on the raw material pigment changes in production.

*In custom-made profiles, orders must be placed after calculating the ceramic height, and adhesive difference.

*In custom-made profiles, customer's approval is important because return or exchange the product is not available.
